Education

University of New South Wales (UNSW)	Feb 2023 - Nov 2026
Bachelor of Computer Science	
• Major: Software Development	
• WAM: 80	
• Relevant study: Object-Oriented Programming, Data Structures, Databases and Web Applications	
• Completed university projects involving Java, JavaScript, SQL and web development	

Experience

Software Development Intern - Nexus Digital Solutions (Shenzhen, China)	Dec 2025 - Feb 2026
• Assisted with the development and maintenance of an internal customer management application.	
• Used Java and Spring Boot to implement REST endpoints for customer records.	
• Wrote SQL queries to retrieve and update application data.	
• Participated in debugging issues reported by the testing team.	
• Helped the team improve application performance and user experience.	

Research & Projects

Task Management Web Application - University Project	Mar 2026 - May 2026
• Built a web application using React, Node.js and Express.	
• Implemented user login, task creation, status updates and basic search functions.	
• Connected the application to a MySQL database through REST APIs.	
• Worked with three students and managed project files through GitHub.	
Library Management System - Object-Oriented Programming Project	Aug 2025 - Oct 2025
• Developed a Java application for recording books, members and borrowing activity.	
• Applied classes, inheritance and exception handling to organize the program.	
• Tested key functions and corrected errors identified during development.	

Volunteering & Activities

General Member - University Computing Society	Mar 2024 - Nov 2025
• Attended coding workshops, technology seminars and networking events.	
• Participated in discussions about software development and emerging technologies.	
• Supported several society activities during the academic year.	
Technology Event Volunteer - University Student Association	Feb 2025 - Nov 2025
• Supported technology-related student events and workshops.	
• Helped participants with registration and basic technical questions.	
• Worked with other volunteers to complete event activities on schedule.	

Skills

- **Technical Skills:** Java, Python, JavaScript, React, Node.js, Spring Boot, SQL, Git, GitHub, Basic AWS
- **Software Skills:** Object-oriented programming, REST APIs, basic testing, debugging, data structures
- **Core Skills:** Problem solving, teamwork, communication, attention to detail, willingness to learn
